

## User Guide (Demo Walkthrough)

This section guides the user through how to use the AI Résumé Generator from start to finish.

### ◇ Step-by-Step Walkthrough

#### 1. Launch the App

- a. Open the web link to the AI Résumé Generator in your browser (e.g., via CodeSandbox or deployed link).
- b. The homepage shows a form titled "**AI Résumé Generator**" with a logo at the top.

#### 2. Fill Out the Form

Complete each field in the form:

- a. **Full Name** – e.g., *Jane Doe*
- b. **Email** – e.g., [jane.doe@example.com](mailto:jane.doe@example.com)
- c. **Job Title** – e.g., *Frontend Developer*
- d. **Skills** – comma-separated, e.g., *HTML, CSS, JavaScript, React*
- e. **Experience** – full sentences or bullet points describing work history or projects.

#### 3. Click “Generate”

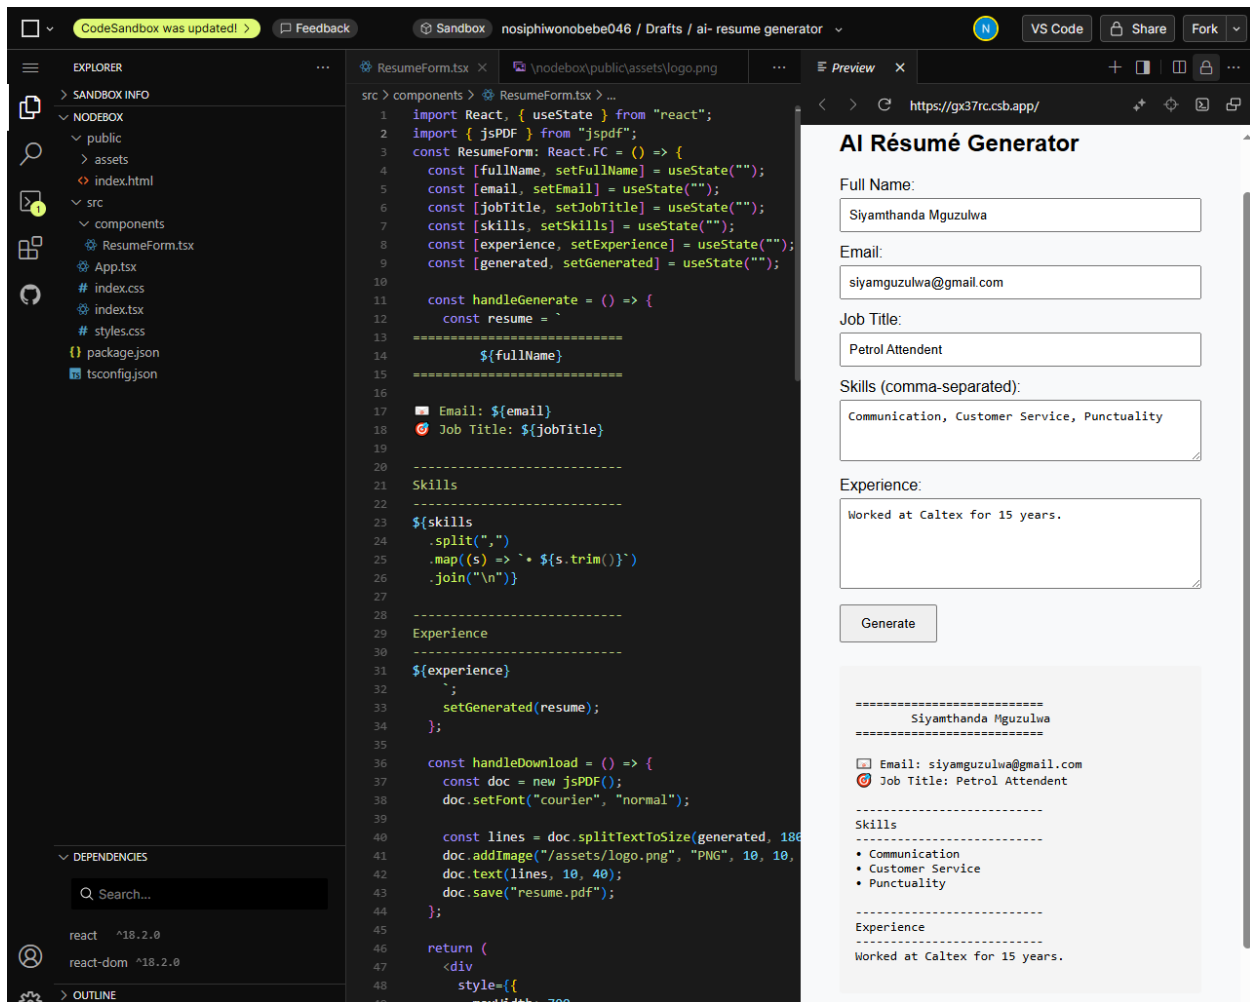

- a. After filling out the form, click the **Generate** button.
- b. A formatted résumé preview will appear below the form in a clean, readable style.

#### 4. Review the Output

- a. The résumé is shown in a preview box.
- b. Make any changes to the form fields if needed and click **Generate** again to refresh the output.

#### 5. Download the Résumé

- a. Click the **Download PDF** button.
- b. Your résumé will be downloaded as a `resume.pdf` file, styled in a typewriter-style format using Courier font.
